

Colex International Limited

Manufacturer of flexible thermoplastic hose & tube

Colex can supply hose & tube in the following materials:
PVC, Nylon, Polyurethane, Polyethylene, Silicone, PTFE, FEP & DIN Spec Nylon.
Custom fabrication is also available.

Colex Statement on the REACH Legislation

(Registration, Evaluation, Authorisation and restriction of Chemicals)

REACH is a new European Union regulation concerning the Registration, Evaluation, Authorisation and restriction of Chemicals. It came into force on 1st June 2007 and replaces a number of European Directives and Regulations with a single system.

REACH applies to substances manufactured or imported into the EU in quantities of 1 tonne per year or more. Generally, it applies to all individual chemical substances on their own, in [preparations](#) or in [articles](#).

All the materials used by Colex International are already in their final state; we melt the materials and form them into tubes and hoses (articles). We have checked with our raw material suppliers that all the chemicals used by them or their suppliers have been pre-registered under the requirements of REACH and they have assured us that this is the case, or pre-registration is underway.

All flexible PVC materials contain plasticisers which give the material its flexibility. These plasticisers are substances that product users have to be notified about under REACH if they are used in quantities >0.1%. Colex International Ltd have 2-ethyl(hexyl) phthalate and butyl benzyl phthalate in the flexible PVC that we use in quantities >0.1%.

For all the materials used by Colex we have a MSDS (Material safety data sheet) on file, and can supply these on request.
